Sir:

I, Thomas E. Creamer, a citizen of the United States, residing in Boca Raton, Florida, hereby declare and state as follows:

1. I was employed by International Business Machines Corporation (IBM) of Armonk, New York at the time the above-identified application was conceived. I make this declaration in support the above-identified application.
2. IBM has invested substantial time and effort into the research, development, and marketing of their products, and in an effort to protect its rights in all new inventions, IBM requests that all employees prepare and submit confidential Invention Disclosure Forms upon conception by the inventor(s).
3. As a named co-inventor for this invention, I and my co-inventor prepared and submitted the attached Invention Disclosure No. BOC8-2003-0067 (hereinafter "Invention Disclosure") pursuant to IBM guidelines.
4. The Invention Disclosure was originally submitted for consideration to an IBM Attorney/Patent Professional for preparation of a patent application on April 29, 2003, and was insubstantially modified on May 8, 2003. The content of the Invention Disclosure has not been subsequently modified. The Invention Disclosure represents a fully conceived and workable invention as written. I reviewed the claims of the above-mentioned patent application prior to submission of the application to assure the claimed invention was fully supported by the

***Main Idea**

1. Background: What is the problem solved by your invention? Describe known solutions to this problem (if any). What are the drawbacks of such known solutions, or why is an additional solution required? Cite any relevant technical documents or references.

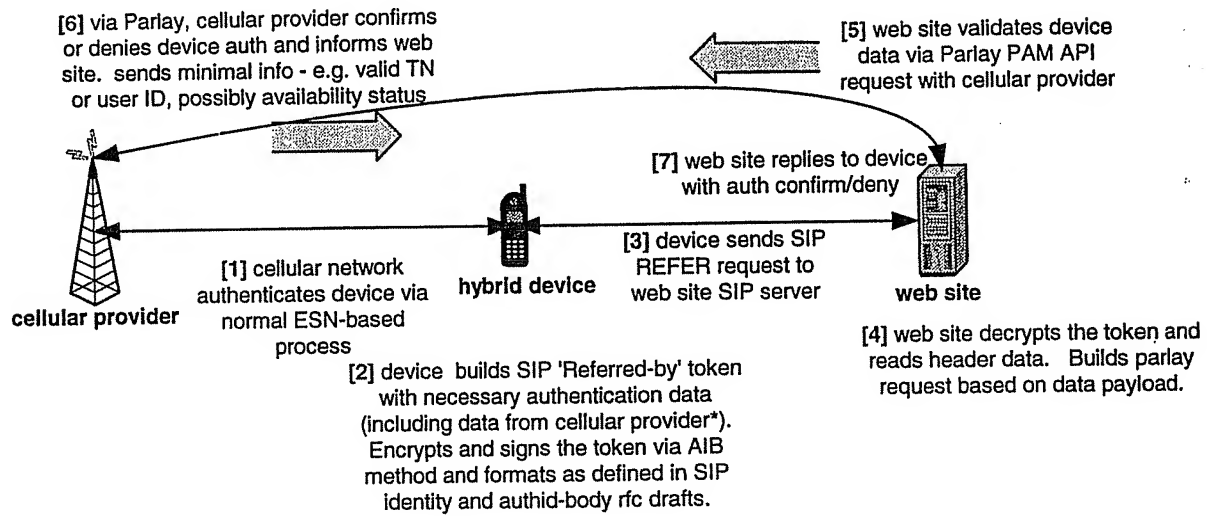

802.11 and other wireless IP networks (802.16, 802.20, 802.15, etc) are growing in the number of users. In particular, 802.11 hotspots are becoming a world-wide phenomena with thousands of these networks being deployed throughout the world in hotels, airports, Internet Cafes, and coffee shops. These wireless data networks allow a user to roam into a hotspot, get connected to the wireless network, and begin a wireless data session to access web content or, through a VPN, to access private/secure corporate content. As wireless devices, services and hotspots become more ubiquitous, the need for authentication between the wireless device and IP-based systems (such as a Web site) becomes increasingly important. This invention is a scheme for authenticating a wireless user via cellular networks, SIP, and Parlay methods.

2. Summary of Invention: Briefly describe the core idea of your invention (saving the details for questions #3 below). Describe the advantage(s) of using your invention instead of the known solutions described above.

The core idea of the invention assumes a hybrid cellular/802.xx device (see related disclosure). In this device users would have both a cellular and a 802.xx radio. This device would bridge the standard cellular network authentication (through existing techniques, such as ESN) with a SIP-based communication between the wireless user and the IP-based system. Using this combination, the IP-based system would verify the wireless user through Parlay methods back to the cellular network provider. This cycle provides the IP-based system with a method to authenticate the wireless device and user with their cellular provider, thereby providing a closed-loop verification process which the IP-based system can use to define further authentication rights and access. Additionally, with the combination of the Parlay proxy back to the cellular provider, the invention provides a method for stronger SIP authentication mechanisms, which could potentially prevent identity theft.

3. Description: Describe how your invention works, and how it could be implemented, using text, diagrams and flow charts as appropriate.

The diagram below describes the steps involved in the invention:

[*] the data from cellular provider is only what will be needed for the web site to validate the device via parlay with the cell provider.
E.g. Telephone Number (TN), User ID (name token, internet id, etc.)

Jim,

Should have got back to you earlier on this. I've read through the paper and it describes how to map Parlay API's over a SIP system. No where in the paper does it describe a technique to use SIP functionality to pass an 802.11 access request to a Parlay gateway for authentication approval/denial. I agree that their paper assumes that the user must be authenticated to use SIP services, but, they don't describe how this is to be done. Therefore, I agree that the paper is background material and does not appear to me to be prior art.

How does each of the Related Art references correspond to the Search Feature? (Claims if Validity/Clearance)

Patent 6487602 relates to a telecommunications system for messaging between a mobile station 20 with an Internet protocol based cellular network 10 and an Internet web site 200 on a server 210 connected to the Internet 160. Authentication of MS 20 takes place in steps 415-402 (see col. 5).

What features does the Background Art provide:

Patent 6456852 – cellular telephone/internet arrangement including subscriber authentication.

Patents 6580906, 6035193, 6097817 – authentication in a wireless communication system.

What features were not found?

RE: Draft Patent Application for
AUTHENTICATION OF MOBILE COMMUNICATION DEVICES USING MOBILE NETWORKS, SIP, AND
PARLAY
IBM Docket No. BOC9-2003-0068; Our Reference No. 6169-459

Dear Inventors:

Attached please find a draft of a patent application and associated drawings for your review in the above-identified matter. Please review the application carefully to ensure that the description of the invention accurately recites all of the invention's characteristics in the broadest possible manner, while also explaining, in detail, the preferred embodiment of the invention. The drawings should also be reviewed to confirm that they accurately depict the various details of the invention as you and your co-inventors understand them.

Importantly, please ensure that each inventor named on the cover sheet of the patent application has contributed to the conception of your invention as described in at least one of these claims. If, for some reason we have neglected to list an inventor who has contributed to the conception of subject matter described in a claim, please so advise us immediately.

Once you have reviewed the draft application, please forward your comments and/or any suggestions you may have.

Please keep in mind that we have been asked by the IP Law Department to file the referenced patent application in the U.S. Patent and Trademark Office on or before year-end, and as such, would appreciate your prompt attention to this request.

Very truly yours,

IBM Docket No. BOC9-2003-0088; Our Docket No. 6169-459

Dear Gentlemen:

Enclosed please find for execution a final draft of the above-identified patent application, a REDLINED version of the application which reflects the requested revisions, the Drawings, the Declaration and Power of Attorney, the Assignment, and the Oath and Assignment for the Republic of China.

After your review of the redlined application, if the patent application accurately recites all of the invention's characteristics, if MR. HILF could please print out the formal documents, sign where indicated, then forward the original documents via overnight to MELANIE ESQUIVEL in the IP Law Department of Boca Raton so she can have each remaining Inventor sign and date where indicated. Ms. Esquivel will then please forward by facsimile transmission to our attention at fax number 561-659-6313.

Please keep in mind that we have been asked by the IP Law Department to file the referenced patent application in the U.S. Patent and Trademark Office on or before December 15, 2003, and as such, would appreciate your prompt attention to this request.

Please feel free to contact Mr. Cuenot or myself should you have any questions or comments.

Docket No.: BOC9-2003-0088 (459)

DECLARATION AND POWER OF ATTORNEY FOR PATENT APPLICATION

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name; I believe I am an original, first and joint inventor of the subject matter which is claimed and for which a patent is sought on the invention entitled:

**AUTHENTICATION OF MOBILE COMMUNICATION DEVICES USING
MOBILE NETWORKS, SIP, AND PARLAY**

the specification of which is attached hereto and identified by the Attorney Docket Number appearing above.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims.

I acknowledge the duty to disclose information which is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, § 1.56.

I hereby claim foreign priority benefits under Title 35, United States Code, § 119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

Prior Foreign Application(s)

<u>Number</u>	<u>Country</u>	<u>Day/Month/Year</u>	<u>Priority Claimed</u>
---------------	----------------	-----------------------	-------------------------

I hereby claim the benefit (a) under Title 35, United States Code, § 119(e) of any U.S. application listed below and identified as a provisional application, or (b) under Title 35, United States Code, § 120 of any U.S. application listed below and not identified as a provisional application, and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior U.S. application in the manner provided by the first paragraph of Title 35, United States Code, § 112, I acknowledge the duty to disclose information material to the patentability of this application as defined in Title 37, Code of Federal Regulations, § 1.56 which occurred between the filing date of the prior application and the national or PCT international filing date of this application.

Prior U.S. Application(s)

<u>Serial Number</u>	<u>Filing Date</u>	<u>Status</u>
